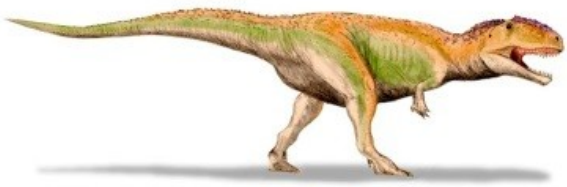
Name: _____ Date: .....

Read and complete the facts card below:



The **Giganotosaurus** was bigger and faster than T-rex, but lived 30 million years before, in what is now South America. Its habitat was the swamp. Like T-Rex it was a carnivore, which means it ate meat. It wasn't the smartest dinosaur, we know this because it had a small brain, which was shaped like a banana! It had short arms, with three fingers. It must have been a scary predator, it was 12 metres long and 5 metres tall, and it weighed 8,000 kilograms!

.

Name of dinosaur: _____

.

Lived: _____years before the T-rex

.

Eats: _____

.

Length: _____

.

Height: _____

.

Weight: _____

.

Habitat: _____

.

Features:

_____ and _____ than a T-rex
