WORD PROBLEMS 2.OA.01

SCOOT

scavenger hunt

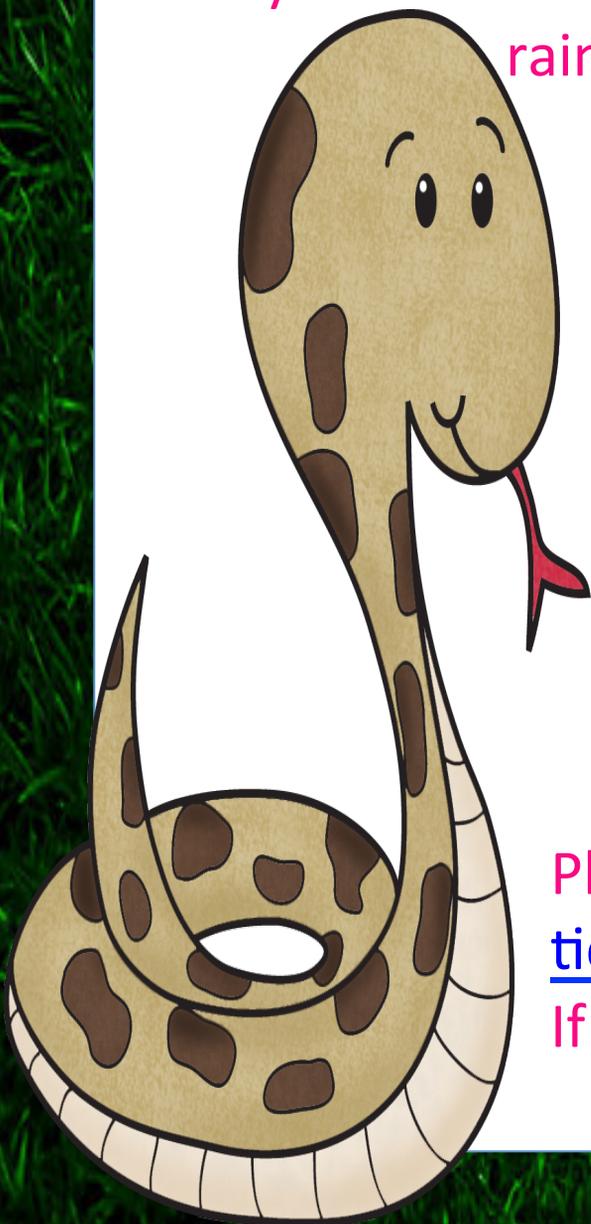

ASSESSMENT

CENTERS

tic-tac-teach123

HELLO!

THANK YOU for downloading my first creation! These word problem cards are great for extra practice and tie in many facts and animals from the rainforest.

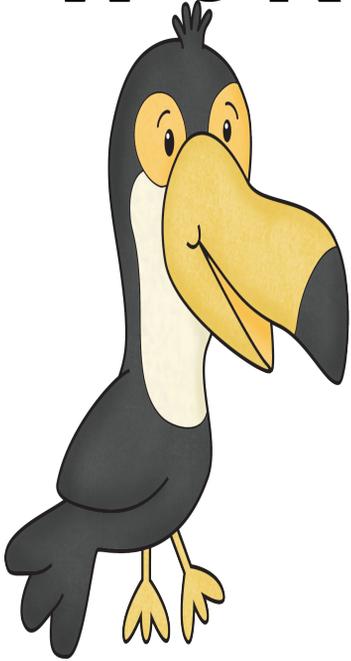

I set these cards up as a math rotation for one week and then later gave them an individual assessment. You could also set these up as a scavenger hunt or “SCOOT” game.

Please e-mail me at tictacteach123@gmail.com

If you have any questions!

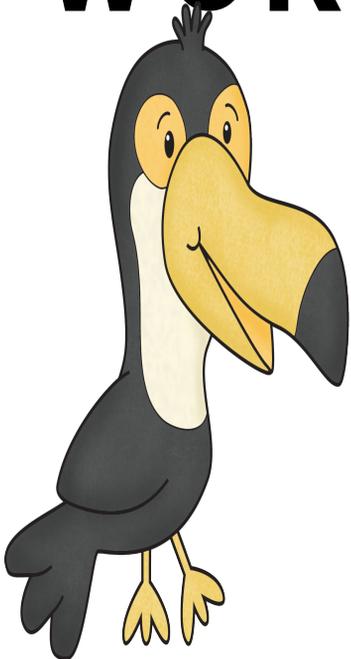

tic-tac-teach123

WORD PROBLEM 1

Tony the toucan ate 41 insects and 29 berries. How many more insects did he eat than berries?

WORD PROBLEM 2

Timmy the toucan is 33 centimeters tall. Tony the toucan is 65 centimeters tall. How much taller is Tony than Timmy?

WORD PROBLEM 3

Bianca the boa constrictor laid 44 eggs in the spring and 48 eggs in the summer. How many eggs did she lay in all?

WORD PROBLEM 4

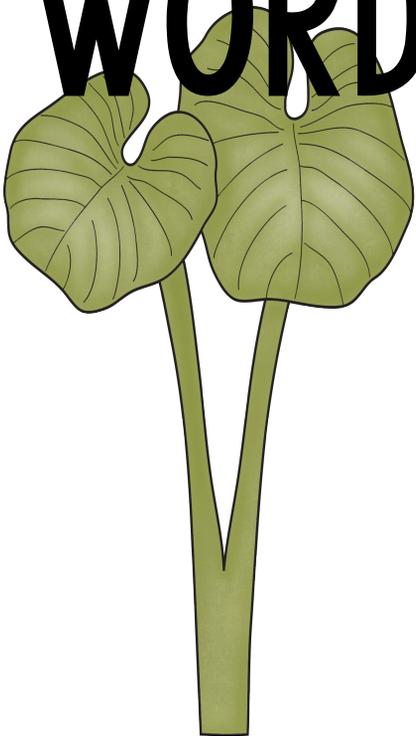

Bianca the boa constrictor laid 26 eggs. Beyonce the boa laid twice as many eggs as Bianca. How many eggs did Beyonce lay?

WORD PROBLEM 5

There is a troop of 20 howler monkeys living in the canopy of the rainforest. 8 of the monkeys are fully grown while the rest are still young. How many of the monkeys are still young?

WORD PROBLEM 6

There are 150 different kinds of butterflies that live in the understory of the rainforest. Eliza spotted 75 of them. How many did she not spot?

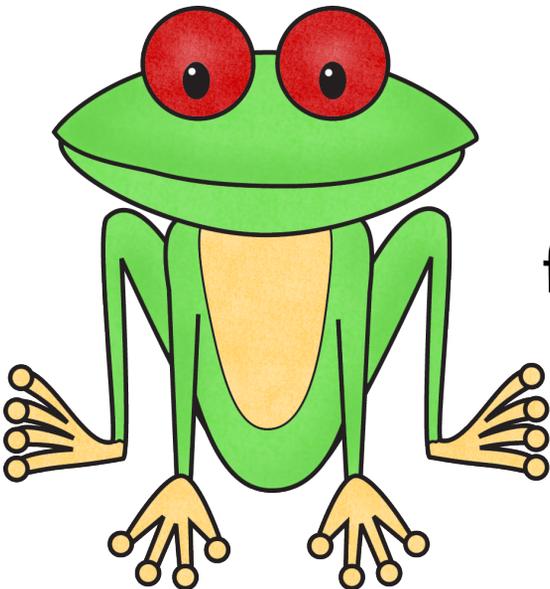

WORD PROBLEM 7

One jaguar that lives in the understory has 57 spots. Another jaguar has 65 spots. How many spots do the two jaguars have all together?

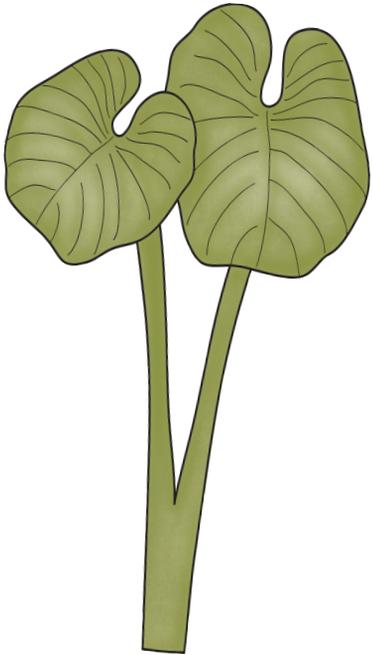

WORD PROBLEM 8

If a red-eyed tree frog jumped 40 inches and a smoky jungle frog jumped 23 inches. How many more inches did the red-eyed tree frog jump?

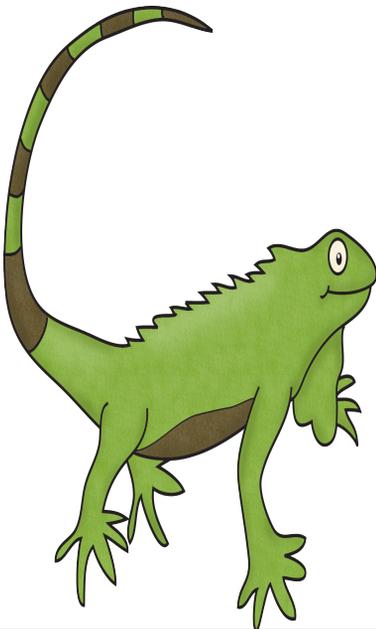

WORD PROBLEM 9

Tarzan picked 36 bananas on Monday. On Tuesday, he picked 27 more bananas and then sold 23 to his neighbor. How many bananas does Tarzan have left?

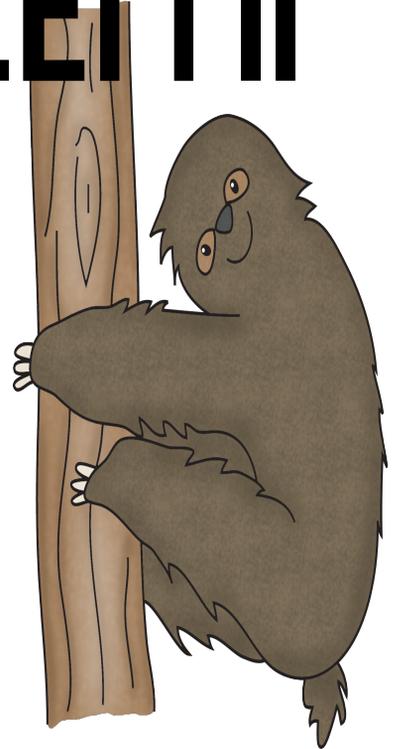

WORD PROBLEM 10

Bam Bam picked 23 oranges on Wednesday. On Thursday, he picked 22 oranges and 12 bananas. How many oranges did Bam Bam pick in all?

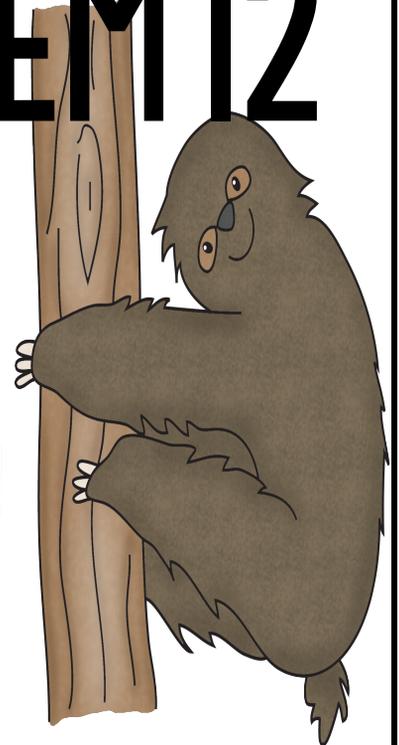

WORD PROBLEM II

A three-toed sloth sleeps for 10 hours on Thursday, 8 hours on Friday, and 10 more hours on Saturday. How many hours did the sloth sleep?

WORD PROBLEM I2

Sally the sloth moves 12 feet every minute. How many feet would she move in 4 minutes?
