

Subject Intent Statement
Science
<p>Asdan offers students the opportunity to explore various life skills through different topics, where learning is adapted to learning styles and all learning levels. Students are able to choose their projects that reflect the outlined plans by using their imaginations. The aim is to intrigue curiosity in learning, environment and life as a whole. All lessons are inclusive and offer a holistic approach enabling students to explore topics of interest and areas they may not have considered to date. Students will be able access various short courses, such as, gardening, gaming, key skills, IT, football, and careers. In doing so they will be studying areas of interest to them and using methods of presentation they choose which is a motivating factor for them.</p>
